ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: ARTICLE MOUNTING

(57) Abstract: An arrangement for eccentrically mounting an camera a support arrangement (1) incorporating two main portions (2, 3, 7) that are adapted for relative rotation about a predetermined axis defined by the orientation of the support arrangement with respect to the horizontal/vertical in such manner that in the event of said relative rotation a predetermined axis of the article/apparatus/camera effectively remains in its initial position. An electric motor mounted on one portion (2, 3), the motor being arranged to rotate a gear/pinion (9, 32, 33) engaging with a tooth rack (8, 27, 31) coaxial with said direction and provided upon the said other portion. The arrangement is combinable with an adjustable level article support unit including telescopically engageable sections (2, 5, 12, 13) including a main post section (2) and at least two further post sections (5, 12; 5, 12, 13) that are adapted to be independently positional set with respect to the main section.
